LAUSANNE COLLEGIATE SCHOOL

MY GOAL

To build and support unique web experiences.

PAST WORK

DigitalOcean | Developer Support Advocate
May 2016 – Present
My primary responsibilities revolve around ensuring every developer or business on our platform has their needs looked after. If there are platform issues, I work with the rest of the company to ensure we prioritize solutions to the heaviest customer-facing problems. It's exposed me to the extreme scale of the cloud, let me use new technologies, and learn from great people!

Assistagrow | Co-Founder/Chief Product Officer
January 2017 – March 2018
I was exposed to a number of new growth opportunities:
- Recruited/led/managed a team of 8 people to build a robust hardware/software agriculture tool suite
- Fully designed a mobile, tablet, and desktop dashboard for the tool suite
- Roadmapped via lean product methodologies
- Worked with contractors, lawyers, and other business associates to move the company forward
- Architected front-end and back-end IoT systems, prioritizing scalability
- Worked with bare metal hardware to build IoT back-end cluster
- Managed a larger budget than on any project previous

UniversityRecruitMe | Co-Founder/Lead Developer
August 2013 – June 2016
Learning critical web development/sysadmin skills during high school proved to be instrumental in my life:
- Single Page App web development (Graceful degradation)
- The Cloud, and microservice architectures
- Teamwork when making product decisions
- Working with other developers/designers
- Agile development workflows

SKILLS

Web Development
- VueJS / Vuex / Nuxt / Nuxtent
- React / Redux
- Angular
- Django / Django REST framework

UI / UX
- Sketch
- Adobe CC
- Affinity Designer
